

- Are broad goals good?
- At col, had mentoring group that was useful
 - it was both social + mentoring/developmental, informal
- Dept. wide facebook?
- Do we want to help mentor undergrads?
 - undergrad → grad panel was under consideration in career development
 - mentoring ~~is~~ helps you understand how far you come
 - stage it, later is better, we could ease into undergraduate relations after we have formed
- Outreach
 - physics has outreach, we don't need to do more outreach
 - we can help connect people to outreach
- Informal mentoring about lab groups / research groups would be good
- Developing Alumni network would be good for professional development

- In mission statement, be careful about wording to show emphasis
- Do how do we want to move forward with drafting?
 - draft on slack
 - Committee synthesis of content
 - select a committee, too much work
- ↳ send out slack invite, draft there
- What do we want to achieve within the first year to succeed in our broad goals
 - cookie time
 - get dept to make orientation more substantial
 - welcome picnic/potluck
- next step structure and mission statement?
- want officers to be able to work over summer
- Want June 1st elections? July 1st?
- Next meeting focus on structure
- mission statement + structure slack channels will be created
- How many people will commit time to this?
 - ↳ may influence structure
